

June Bom

Cut four 2.5 inch strips WOF from background fabric to make first border

Cut four 1.5 or 1.25 inch strips WOF from dark fabric for second border

Cut four 4.5 inch strips WOF from secondary fabric for last border

Measure the center of your finished 9 patches to determine the length of first side border

After you sew the sides on re-measure the center again to cut the length for the top and bottom strips

Do this each time before you cut the length of the other borders

I added flying geese to my outside border
